

Graydon Creditscan

Video Transcript

“Obtaining Credit or Business Reports on companies is not necessarily enough to enable you to engage in proactive credit risk assessment.

So, there are a few extra steps you can take to manage risks more easily and effectively.

Firstly using one of our products CreditScan you can analyse your ledger to see the most up to date picture of your customers’ financial health.

This process is fast and effective and completely confidential.

By using CreditScan to analyse your ledger you will see exactly which companies are doing well and which are struggling – those with high borrowing or high credit risk.

Secondly, once you have identified those companies, it’s useful to continually monitor them to make sure you keep one step ahead and can take action if needed.

Why not combine your CreditScan with CreditWatch which will alert you should any critical events occur on your ledger or if the ratings change on your customers.

For more information on these products.....”
